

# GOOGLE EARTH SIMPLE HELP

This button lets you see an overview map and a latitude and longitude grid.

Click here to find the **measuring tool**.

Click here if you can't see the whole screen.

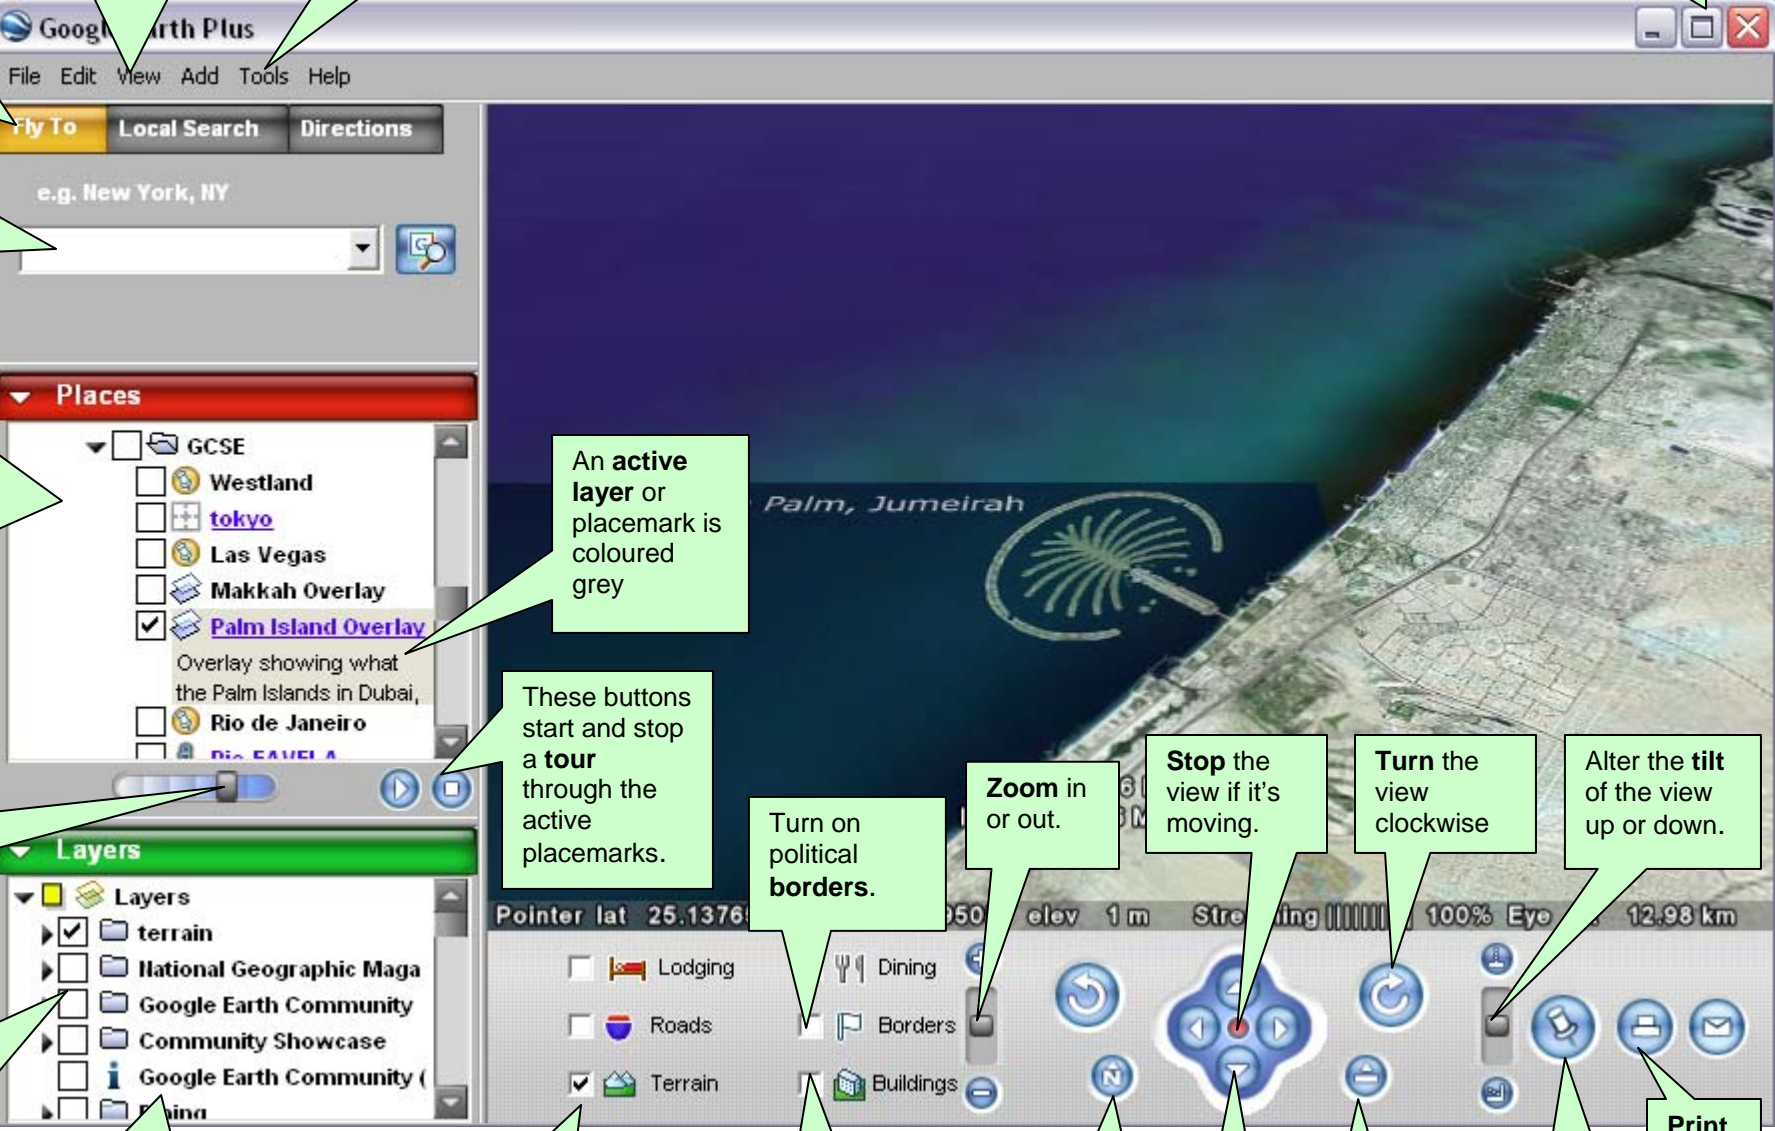

Fly To **finds places**. Local Search finds businesses.

Type in the place you want to go to here. Then click the blue button.

This is the **Places Folder**. Click the arrows to open and close folders. The check box turns **overlays** and **placemarks** on and off.

The slider changes the **transparency** of active layers.

This is the **Layers Folder**. Turn off all unnecessary layers to keep the screen uncluttered.

An **active layer** or placemark is coloured grey

These buttons start and stop a **tour** through the active placemarks.

Turn on **political borders**.

**Zoom in** or out.

**Stop** the view if it's moving.

**Turn** the view clockwise

Alter the **tilt** of the view up or down.

Turn on **3D buildings**.

Reset the view to face north.

Reset the tilt of the view

Click to create a **new placemark**

**Layers** add more information to the map, but some are for the USA only.

Turn on to see the **terrain** (shape of the land).

**Move** left / right / up / down.
